FOR BOTANIC GARDENING

GREENFERT

16+16+16+TE

For Green Turf & Lawn Field

GREENFERT 16+16+16+TE uses MOP (potassium chloride) as the potassium source. Potassium is important for all crops as it improves plant tolerance to stress and many plant diseases. Potassium is also vital to the regulation of water movement through the plant.

GREENFERT 16+16+16+TE can also be used as a supplement for lawns and turf grass for greening.

GREENFERT 16+16+16+TE compound fertilizer is a premium homogeneous fertilizer for maintaining ornamental landscape plants such as foundation plantings, shrubs, ground covers, trees, roses, and flowers. It helps to promote overall growth.

GREENFERT 16+16+16+TE contains an excellent combination of immediately available Nitrate Nitrogen and slower releasing Ammonium Nitrogen.

GREENFERT 16+16+16+TE has balanced nitrogen which results in faster growth responses, higher yield and bigger produce. Also, a more efficient nitrogen source means lower loss of nutrients to the environment.

GREENFERT 16+16+16+TE contains both water-soluble and ammonium citrate soluble phosphates to give greater availability and longer lasting availability of phosphorus to crops over a wide range of soil types.

Directions of Use:

Scatter one teaspoon (4g - 5g) per small pot of plant & two teaspoons (8g - 10g) per large pot of plant - once every 2 weeks, water immediately after application to speed up the absorption of the fertilizer.

Benefits:

- ✓ General purpose balanced NPK fertilizer suitable for all kind of soils and crops.
- ✓ Suitable to spread by hand or machine on the field.
- ✓ Contains high ammonium-N. Which is important to keep a sustained delivery of nitrogen.
- ✓ All Phosphorus is fully plant available, as water soluble Orthophosphates and Ammonium citrate soluble Di-Calcium Phosphate. The combination of different forms gives greater and a longer lasting availability of Phosphorus to crops over a wide range of soil types.
- ✓ Potassium Sulphate based fertilizer which improves the production of most fruits and vegetables. Using a Potassium Sulphate based fertilizer is particularly important for crops with a low tolerance to Chloride.
- ✓ Soluble in water.
- ✓ Non-burning - high crop safety.
- ✓ Frequent applications at low rates give best results in sustaining growth.
- ✓ Improve drought and disease tolerance.
- ✓ Improved root development.
- ✓ Improved plant health.

Chemical Analysis:

Nitrogen (N)	16%	Copper (Cu) - EDTA	100 PPM
Phosphorus (P ₂ O ₅)	16%	Manganese (Mn) - EDTA	500 PPM
Potassium (K ₂ O)	16%	Zinc (Zn) - EDTA	250 PPM
Sulfur (S)	5%	Boron (B)	50 PPM
Iron (Fe) - EDTA	500 PPM	Appearance	Granular
